

SWITCHLESS RESELLER

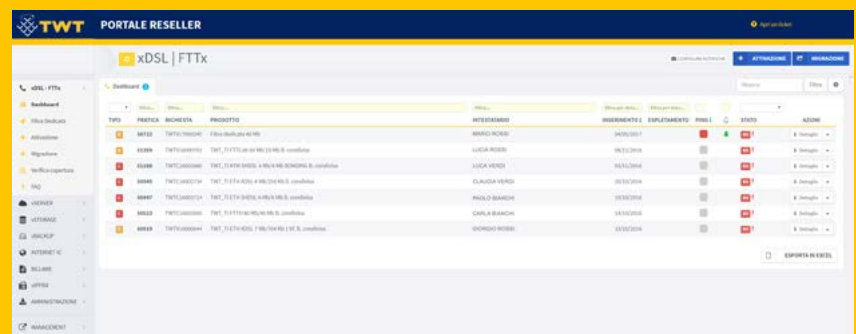

The service providers who choose to take advantage of TWT's experience, have a head start when it comes to grasping all market opportunities.

SPECIALIZED CONSULTANTS ABLE TO SATISFY THE PARTNER'S REQUIREMENTS

Switchless Resellers are those resellers who depend on TWT infrastructures and services to provide ICT and TLC services, while retaining their own brand name.

THE RESELLER PORTAL

TWT has created the Reseller Portal, a **provisioning, management and reporting area for the exclusive use of operators, where, entirely on their own,** they can activate and migrate lines, manage equipment, activate services, maintain customer lists and conduct any other type of activity necessary for a rapid management of all resources.

The solution enables the complete and flexible management of all services through the dedicated web interface.

THE VARIOUS VOICE PROFILES COMPRISE:

- **VoIP** (Reseller VoIP)
- **CPS** (Carrier PreSelection)
- **WLR** (Wholesale Line Rental)

OTHER AVAILABLE FEATURES:

- **Geographic Numbers** (GN) and Number Portability management
- **Non-Geographic Numbers** (NGN 800, 848, 840)
- **International toll-free numbers**
- A wide range of **security barriers and anti-fraud systems**
- **Daily data downloads for invoicing** (CDR)
- **Routine reports** on the status of your Clients' lines

VIRTUAL PBX:

It is also possible to VoIP lines to the new TWT Virtual PBX (vIPPBX), which enables the provisioning of traditional functions as well as more advanced functions including phone autoprovisioning, IVRs, call center services, CRM integration and much more.

It is possible to **purchase individual internet access lines** through the special Reseller portal in which **each line may be activated according to the various profiles available.**

Complete coverage and the widest range of technical services are guaranteed by the possibility to choose from several different last mile carriers.

Through the use of our technological platform, the provisioning process is simple and rapid, enabling the purchase of individual profiles that are customizable in terms of access technology and bandwidth.

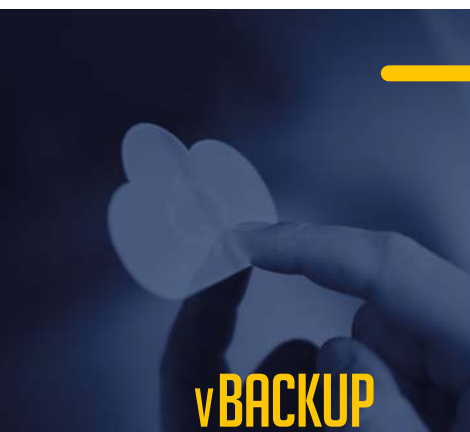

IC (Internet Communication) is the solution which integrates the most innovative communication tools on one single platform: **domains, email center, Fax2Mail, Web Hosting, FTP Hosting and DNS.**

This service enables Resellers **to set up their own secure and reliable virtual infrastructure** in the TWT cloud, with flexible options in terms of processing, RAM and storage needs.

Compatible with all types of software based on the S3 standard, this solution enables **the management of cloud space for company data storage**.

Whether used singularly or connected to the vServer, this service is a user-friendly and versatile product.

Directly accessible via the dedicated section of the TWT Reseller Portal, or in the vServer section, this service provides a complete backup solutions for servers, PCs and mobile devices as well as leading applications such as MS exchange and SQL databases.

As an authorized provider registered in the public list of Agency for Digital Italy (formerly DigitPA), TWT offers the **Posta Elettronica Certificata** or **Certified Electronic Mail Service**. This solution has been specifically studied for those operators wishing to resell PEC mailbox access to their Clients.

Switchless Resellers **have access to different types of services designed to satisfy the requirements of those Clients** who have no need for their domain to indicate the organization they belong to, as well as those wishing to register their PEC domain and use it to activate their own mailboxes:

- **Certified Reseller domain**
- **Subdomain chosen by the holder**
- **Domain or subdomain owned by the holder**

ALSO AVAILABLE IN THE OFFER:

- **Email notification service**
- **Archiving**

The Co-location service enables Resellers to use an **infrastructural outsourcing solution, while retaining full management and ownership of their equipment.**

In fact, this service **enables Resellers to house their own and their Clients' servers and network equipment in the TWT data room**, which ensures maximum scalability and flexibility of resources.

Systems and infrastructures are managed in such a way as to guarantee Business Continuity (electricity, air-conditioning, fire-prevention, perimeter security) and are subject to constant monitoring and surveillance by specialized staff.

TWT Cloud Connect enables you to reach the main Cloud Players via private access, which guarantees far greater reliability and performance than any internet-based solution.

FUNCTIONS AND ADVANTAGES:

- **Private connection**
- **Private data storage**
- **Reliability**
