

WHOLESALE VOICE TERMINATION

International and domestic voice traffic transit and termination. Experience the TWT innovative communication solutions and get inspired by our quality, security, global connectivity, regional platforms, hubs and the confidence that comes from partnership with a reliable brand name.

ITALIAN PREMIUM QUALITY LANDLINE OPERATOR

DISCOVER OUR SELECTION TO MEET YOUR SPECIFIC NEEDS

TWT is able to respond to your requests and offers a **variety of service levels** to most effectively match your unique needs. We work closely with you in view of your strategic priorities and the needs of local markets.

Whether you are carrier or a service provider, we can provide a turnkey solution or take a fully tailored approach.

The services are available in several product classes, which vary in quality and price: Standard, Premium and the tailored offers ('dedicated routing').

WE GUARANTEE

- Top quality of the services on the A-Z
- CLI – Roaming with managed number portability
- Origin Based Routing/Pricing/Billing
- The best ASR and ACD parameters
- Web interface dedicated to operators with real-time traffic data

ROUTING FLEXIBILITY

With fully intelligent network, we are able to proactively manage ported traffic or implement A-number based routing, offering tailor made routing for our customers with any negotiated price/quality mix.

TECHNOLOGY

TWT offers both voice traffic termination services as well as voice transit for domestic and international Operators.

The services are provided through Operator interconnections. The connection can be made using VoIP (SIP) technology, through dedicated links, the internet or encrypted VPN.

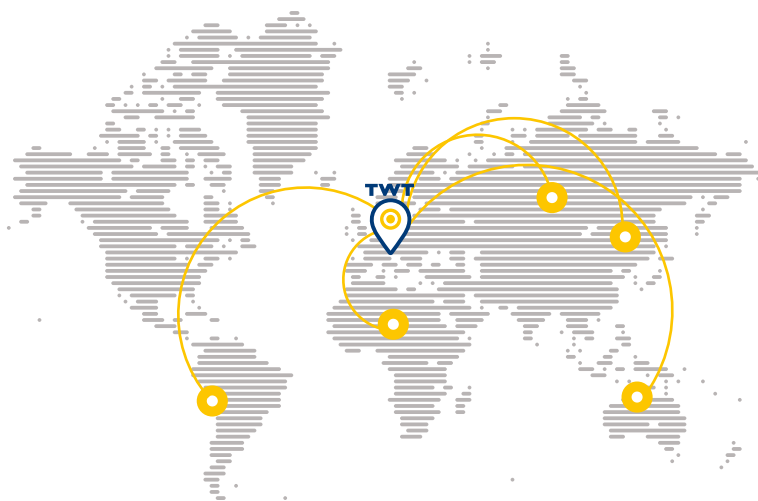

QUALITY

With strong focus on quality, we manage advanced monitoring and testing tools (real-time voice network monitoring system, general quality parameters, CLI verification, FAS detection).

OUR INTERNATIONAL NETWORK

For over two decades TWT develops its business from Africa to Eastern Europe with in-country direct interconnections with PTTs, OLOs and MNO. This is why we are able to provide voice transit to all fixed and mobile networks in any spot in the world.

With our traffic management system we select the optimal transit route and guarantee top quality of the service while maintaining an attractive price.

THE PERFECT SOLUTION FOR ALL OUR CLIENTS' NEEDS

- **Customer Service** available 24/7/365
- **Direct interconnections** with more than 70 selected domestic and foreign carriers
